DETAILED ACTION

Response to Amendment

This Office Action is in response to the interview held on December 5, 2006 and applicant's After Final amendment filed on December 11, 2006. In view of applicant's amendment and remarks, all previous prior art rejections are withdrawn. In addition, all previous double patenting rejections are withdrawn in view of applicant's filing of a Terminal Disclaimer.

Allowable Subject Matter

Claims 1, 3, 5-18, 20-28, and 55 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 27, the examiner concurs with applicant's position that it would not have been obvious to combine Cheng, Feucht, Malis, and Harano to teach the combination of low output impedance, a series resonant circuit, and protection circuitry as claimed. Although each of these elements is known individually in the prior art, the prior art does not properly disclose or suggest these elements in combination, wherein the protection circuitry is responsive to the application of a short circuit at the output lines at the claimed speed. For further details, see applicant's remarks filed December 11, 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3739

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
